Bug Report:

Bug ID: BR_GAME_001 Bug Title: Incorrect Win-Loss Count Placement in Game Statistics Severity: Medium Priority: High Version: 1.2

Description: In the game's statistics section, the wins and losses are not being accurately placed in their respective columns. Instead, both wins and losses are being counted and displayed under the wins column, leading to confusion and inaccurate tracking of player performance.

Steps to Reproduce:

Play a game session, either winning or losing.
Access the game statistics page.
Observe the placement of the win and loss counts.

Actual Result:

- Wins: 5
- Losses: 5

Expected Result:

- Wins: 5
- Losses: 3

Attachments:

- Screenshots of the game statistics page displaying incorrect placement.

Additional Information:

- This issue affects both single-player and multiplayer modes.
- The problem is observed consistently across different player accounts.
- The rest of the game functionality appears to be unaffected.

Environment:

- Game Version: 1.2
- Platform: Windows 10

- Account: Player123

Impact:

- Players cannot accurately track their performance.
- Frustration and confusion among players.
- Negative impact on player engagement and satisfaction.

Steps Taken to Replicate the Bug:

Launched the game on a Windows 10 machine.
Played multiple game sessions, some winning and some losing.
Navigated to the game statistics page.
Observed the incorrect placement of win-loss counts.

Recommendation: The development team should investigate the game's statistics calculation and display logic. The issue seems to be related to the way the win and loss counts are being recorded and displayed on the statistics page. A thorough review of the code responsible for updating and displaying the statistics is necessary. Once identified, corrective measures should be implemented to ensure that wins and losses are correctly placed in their respective columns. Given the high priority of this bug, prompt attention is required to maintain the accuracy of player statistics and prevent player dissatisfaction.

Test Case:

Test Case ID: TC_GAME_001 Test Case Title: Verify Correct Placement of Win-Loss Counts in Game Statistics Description: Ensure that the game statistics page correctly displays the number of wins and losses in their respective columns.

Preconditions:

The player is logged into their account.
A game session has been played with at least 5 wins and 3 losses.

Test Steps:

Play 5 game sessions and win all of them.
Play 3 game sessions and intentionally lose them.
Access the game statistics page.

Expected Results:

- Wins: 5
- Losses: 3

Test Environment:

- Game Version: 1.2
- Platform: Windows 10
- Account: TestPlayer456

Test Plan:

Project Name: Game Statistics Enhancement Version: 1.2 Test Phase: Statistics Display

Scope: This test plan covers the testing of the game's statistics display to ensure that wins and losses are accurately placed in their respective columns.

Objectives:

Verify that the game statistics page displays the correct win and loss counts. Confirm that the statistics display is consistent across different player accounts.

Test Cases:

TC_GAME_001: Verify Correct Placement of Win-Loss Counts in Game Statistics

Test Environment:

- Game Version: 1.2
- Platforms: Windows 10, macOS
- Test Accounts: TestPlayer456, TestUser789

Test Execution: The test case will be executed manually by the testing team on different platforms using the provided test accounts. The test results will be recorded, and any discrepancies identified will be reported using the Bug Report template.

Risk and Mitigation:

- Risk: Inaccurate statistics display may lead to player frustration.
  - Mitigation: Rigorous testing and verification of the statistics calculation and display logic.

Schedule:

- Start Date: [Insert start date]
- End Date: [Insert end date]

Resource Allocation:

- Testers: [Insert names]

- Platforms: Windows 10, macOS

Exit Criteria:

- Successful validation of the statistics display for both wins and losses.
- All identified bugs related to the statistics display are resolved and verified.

Acceptance Criteria:

- The game statistics page accurately displays the number of wins and losses in their respective columns.
- No major discrepancies are observed across different player accounts and platforms.
